Bowel cancer screening initiative starts on the West Coast

By Liz Volckman

The National Bowel Screening Programme was launched on Monday, 31st May 2021 on the West Coast.

The West Coast DHHB are urging everyone who receives a kit in the mail to use it, as it is expected that 10 West Coast residents lives could be saved.

The kits will be mailed to 60-74 year olds in Karamea, provided they are registered with a New Zealand Health practioner.

1200 people will die. Bowel cancer is the second highest cause of cancer deaths in New Zealand after lung cancer, killing more people than breast cancer and prostate cancer combined.

Although the majority of bowel cancers are seen in the over 50's, younger people can still be affected so symptoms shouldn't be ignored. The most common symptoms include :-

- Blood in the stools and/or bleeding from the rectum.
- A change in **bowel** habits lasting longer than 6 weeks (e.g. loose stools, diarrhoea, or constipation)
- Abdominal (stomach) pain
- Lumps or a mass in the abdomen.
- Weight loss.

Hopefully this screening will be increased to include those aged between 50-60 in the not to distant future to match Australia's current Bowel screening

Programme.

Even if cancer isn't detected the kits could help detect some pre cancerous polyps. Finding bowel polyps early and removing them, significantly reduces a persons risk of developing bowel cancer in the future . More than 3000 New Zealanders are diagnosed every year and out of that approximately

For more information you can access the Bowel cancer screening website on <https://bowelscreening.co.nz/> and take the online assessment.

Don't sit on your symptoms

Karamea Wellbeing Centre opens for business

By Liz Kerslake on behalf of LéaRne Palmer

Open for hands on help healing

I've been living in Karamea for over 20 years and have been offering readings, massage and reiki privately for over 6 years now. My gifts are completely spiritual and I can pick up on people in person or over the phone. Recently I have decided to open up my services to the wider community because I'd like people to experience a natural born-gifted healer, and my gifts have so much to offer.

I am aware we are often caught up in the western mindset of doing rather than being, and sometimes we can do with some help finding our inner peace. There'll be times when our inner Self/intuition will call us to get back in touch with our self, and through personal readings and guidance we can awaken blocks we may not even be aware of. Reiki and massages help smooth out the lumps. I can zoom in on the core (centre) of a person and guide them back into their well being.

I welcome sceptics, all I can do is offer the information coming through and people can judge for themselves. Readings are only ever given with consent from the person, and people are welcome to experience the benefits of massage or reiki on their own without a reading too. However, what I have found to be the most popular among clients is a massage and reading together, leaving people feeling grounded and connected to their core.

I can offer 1:1 confidential and caring home visits over the winter season and would love to help you on your personal healing journey. We will start where you are and come from the essence to unlock different levels of well being. I can help you to help yourself, you can choose from one or a combination of:

- ★ Crystal Healing
- ★ Individual Readings - one is usually enough
- ★ Channelling
- ★ Intuitive, Deep & Baby Massage
- ★ Reiki Healing

I'd like to extend my heartfelt thanks to Hannah and Aaron for their support, and to Peter Carreen for being a natural health healer himself. Thanks also to Liz for being awesome.

Please phone or text 021 0283 8596 for more information, certificates, prices and to make a booking

Have a rainbow day,
LéaRne

Testimonials

Mid Winter 12 days of Christmas

By Jud Harrington

Calling all businesses, community groups, community organisations and their sponsors and the Karamea Area School. Come and decorate a Christmas Tree in the theme of your business. This is a chance to

get creative and make your decorations by hand. We can't wait to see the ideas that you come up with. To register your tree please contact Jud Harrington on 0272 273 284.

Registrations close on the 22nd June 2021.

Tree decorating is to take place on June 24th between 5pm—9pm in the Karamea Village Hotel dining room. **There will be a \$50 entry fee** and the trees will be on display for public voting from the 25th June to 6th July.

Voting is by gold coin donation, however if you purchase a meal off the "Mid Winter Christmas menu" this will entitle you to a free vote.

All proceeds from this great new event **will be donated to local charities.** Lets make this a success and perhaps this will lead to an annual event.

Protecting native species in the Heaphy Lowland area.

The Department of Conservation plans to reduce rat and stoat numbers to protect native taonga from local extinction in the Heaphy Lowland area, 24000ha. Please refer to map.

Why we are controlling rats, stoats and possums.

The area surrounding the Heaphy river is known for its lush forests and nikau palms. Giant northern rata, rare coastal cress, roroa/great spotted kiwi, powelliphanta/giant carnivorous land snails, whio/blue duck and pekapeka/ long-tailed bats are a few of the endangered species found in this area. Rats and possums are the main predators for Powelliphanta snails, of which five of the species are unique to the Heaphy valley. Stoats predate kiwi eggs and chicks.

Due to consistently high seed production, warm and diverse habitats and the lack of any natural control events, rat numbers are constantly high in the Heaphy Lowland area.

For these native species to survive and breed successfully, predator populations need to be kept to low levels.

Intensive species monitoring from previous 1080 predator control operations has shown significantly higher long-tailed bat and kiwi activity. Annual 5-minute bird counts in the Heaphy Lowland project area started in 2015. Since then, the range and distribution of kākā, weka and toutouwai/robin have increased. Korimako/bellbird, piwakawaka/fantail, tauhau/silvereye and tui have made significant increases in numbers while other bird species remain stable.

How it is happening

DOC has contracted Vector Free Marlborough Ltd (VFML) to carry out the Heaphy Lowland aerial 1080 predator control work.

The operation will use biodegradable 1080 to control predators. Pre-feed non-toxic cereal pellets will be aerially applied to the area using helicopters followed by

application of toxic cereal pellets containing 1080 within 40 days of the pre-feed operation.

The toxic bait will be sown at a rate of 1.5 kg/ha using 6 gram baits to ensure enough baits are available for control of possums and rats.

The Department of Conservation complies with all relevant regulations and takes a precautionary approach to the aerial application of 1080.

Powelliphanta snail. Photo Credit: Kath Walker

Why we are using this method

Aerial application of cereal pellets containing 1080 is the most effective control method over large areas. It is the only viable method in remote, rugged terrain.

Ground-based trapping and bait stations are effective in smaller more accessible areas. After successful aerial 1080 treatments, rodent numbers typically decrease to zero, before rat numbers rise again with the boost to breeding that abundant food provides. Lizards, bats and invertebrates also benefit from this temporary predator knockdown.

What is Reiki?

By Claire Insley

You have probably seen this word on posters, signs and posts around Karamea, but what does it mean? Pronounced Ray-kee, it is intelligent, healing energy from the universal life force. Practitioners of Reiki are not healers, they are channels for the energy and it is the recipient, who causes the energy to flow. The client pulls the healing energy through the practitioner and it goes to wherever it is needed. The more in need of the healing, the stronger the energy will flow. It is a beautiful, safe, compassionate energy that cannot be used for ill. Reiki always works for the good of the Higher Self, so no harm through its use can befall anyone who channels it or receives it.

Reiki is not a religion, it has no dogma. It is a force for good and works on many levels: physical, mental, emotional and spiritual. It is suitable for all ages, for all time, for past, present and future, for all beings. You do not have to believe in it to feel the benefits. There are 5 precepts which good practitioners adhere to, which all start with the words Just for Today: I will not worry, I will not be angry, I will be grateful, I will do my work honestly and I will be kind to every living thing. Great words to live by for anyone :-)

We are fortunate in Karamea to have many people who have been attuned to the healing energy of Reiki and it is wonderful for self healing, to use on animal friends, to give to plants, the food you eat, enhance your medicines, cleanse and purify your water, your home, your crystals, anything you want to use it for really. You can do no harm with Reiki, you cannot overdose on it, there is no limit to the number of ways it can be used, or how much you can use it. Learning Reiki can be a step on the path to enlightenment for many, it can benefit your life in so many ways.

In order to ensure that standards remain high, there is a membership body for practitioners, Reiki NZ Inc. You can be assured that members adhere to a strict code of ethics and a set of standards as can be seen on the website www.reiki.org.nz. All practitioners must prove their certification in order to be accepted.

Getting your COVID-19 vaccine: What to expect

Vaccines are one of the ways we can fight the COVID-19 pandemic and protect the welfare and wellbeing of our communities.

Protection

COVID-19 vaccines are free and available to everyone in New Zealand.

Vaccines protect your health and prevent disease by working with your body's natural defences so you are ready to fight the virus, if you are exposed.

The COVID-19 vaccine works by triggering your immune system to produce antibodies and blood cells that work against the COVID-19 virus.

Getting a COVID-19 vaccine is an important step you can take to protect yourself from the effects of the virus.

Once you've been vaccinated, continue to take precautions to prevent the spread of COVID-19. Thoroughly wash and dry your hands. Cough or sneeze into your elbow and stay home if you feel unwell. This will help you protect yourself, your whānau and others.

Continue using the COVID tracer app, turn on your phone's Bluetooth function, and you may wish to wear a face covering or mask.

Safety

Medsafe only grants consent for a vaccine to be used in New Zealand once they are satisfied it's safe and effective enough to use. All COVID-19 vaccines will go through the same safety test and must meet the same robust standards.

Pfizer vaccine

This vaccine will not give you COVID-19. You'll need two doses, at least three weeks apart. To ensure you have the best protection, make sure you get both doses of the vaccine.

If you can't make your appointment, reschedule as soon as possible.

Things to consider before getting your vaccine

If you have had a severe or immediate allergic reaction to any vaccine or injection in the past, please discuss this with your vaccinator.

If you are on blood-thinning medications or have a bleeding disorder, please let your vaccinator know.

If you are pregnant, please talk to your vaccinator, GP or midwife.

We are not currently offering the Pfizer vaccine to those under 16 years of age until further data is available.

If you have symptoms of COVID-19, get a test and stay at home until you get your results. You can be vaccinated once you have a negative test.

Business as usual for Cave Tours

By Judith Harrington

The Karamea Information & Resource Centre is pleased to announce the successful purchase of the Oparara Cave Tours from The Oparara Valley Project Trust.

This means "business as usual" for guides, and Centre staff.

There will be very few changes when the purchase completes on July 1.

An experienced Sub-Committee has been set up to oversee the Cave Tours operation, with day to day management responsibilities and marketing handled by Centre staff.

The Trust was keen to keep the Cave Tours within the community and ensure continuity of this key tourism asset.

During the transition period all contacts will remain the same.

The team at Karamea Information and Resource Centre look forward to continuing to promote the Cave Tours and all other Karamea businesses.

Recipe Corner

Article supplied by Donna Chambers

Recipe from Sally Wise book
"A year on the farm"

Feijoa Jam

1 kg feijoa flesh, diced
Juice of 1 large lemon
1/4 cup water
900g Sugar

Method

Place feijoas, lemon juice and water in a large saucepan and bring to the boil, stirring. Reduce the heat and simmer for 20 minutes. Stir in the sugar and bring back to the boil, stirring constantly.

Boil over medium heat for about 25 minutes until setting point is reached.

Pour into warm sterilised jars and seal immediately.

Makes about 1.5kg

FREE COMPUTER TRAINING

Karamea Information and Resource Centre is pleased to advise that we are offering **FREE** IT support to help the older members in our community, and any computer novices, to use information technology to achieve their goals. Please phone us on 7826 652 to make an appointment.

Cheques are being phased out and the deadline is looming. If you need help with internet banking, pop in and we are happy to help!

We have helped a few people already who have appreciated our 'one on one' approach, set at the individual's pace.

Also a reminder that we have free WIFI for public use at the Information Centre in Bridge Street.

The team at the Info Centre

Hi Folks

This week I am focusing on Reiner Fullermack's court case in the global push back against the lockdown and mandatory vaccines. I have also followed that up by a Nelson lawyer Susan Grey who is taking a similar case in Wellington.

In addition, Li Meng Yan a virologist who worked in a laboratory in Hong Kong visited the Wuhan laboratory a few times before 2020, and has alleged that Covid 19 was a patented virus developed in a lab and was released deliberately as part of collapsing the world national economies!

Furthermore, if we haven't had enough of Covid 19 Dr. Strangelove has come back to life in the form of Dr. Klaus Schwab head of the World Economic Forum. Dr Schwab is warning us of a global cyber attack that will be far worse than COVID. I don't exactly know what his credentials are I think it's witchcraft putting a voodoo spell on the world economies.

Finally "No Jab for Me" is sound advice for the conscientious objectors.

If you know anyone in London there is going to be another huge demonstration probably targeting the media.

But first is a comical rock opera by Band Maid and how they intend to deal with the global elite.

Cheers

Paul Drake

Drone and Robotic technology is experiencing an explosive growth. Drone use in farming particularly can bring about higher grass production and provide a definitive method of systematic farming.

- We can provide help with surveys on land use
- Help with mapping of paddocks and crops
- Help with the analysis of soil health
- Environmental impact assessment and flood risk
- Irrigation and nutrient management help
- House roof checks/guttering/flues
- Real estate photography and videos

If you are interested on how we can help please call Archie Volckman on 037826110

Calling all Seniors

Please join us on the 4th Thursday of each month

Senior Luncheon

This is a great opportunity each month to get out and socialise with others whilst enjoying a lovely lunch in the warmth and comfort at a venue to be decided
